Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Sequence 10, Application US/08440861

Patent No. 5710126

GENERAL INFORMATION:
APPLICANT: Grifith, Irwin J.
APPLICANT: Luqman, Mohammad

TITLE OF INVENTION: T CELL EPITOPES OF RYEGRASS POLLEN

TITLE OF INVENTION: A LLERGEN

TITLE OF SEQUENCES: 56

CORRESPONDENCE ADDRESS:
ADDRESSEE: LAHIVE & COCKFIELD

STREET: 60 State Street, suite 510

CITY: Boston

CONTAINMENT OF MASSACHUSELTS
                                                         Length 20;
                                                                                                   6; Indels

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

C:Comment: Peptide YY and pancreatic peptide are identical in this fish but are distinct
C:Comment: The protein has been demonstrated in the pyloric but not the splenic Brockman
C:Superfamily: pancreatic hormone
C:Keywords: amidated carboxyl end; hormone; pancreas
F:36/Modified site: amidated carboxyl end (Tyr) #status experimental
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    N.Alternate names: pancreatic hormone; pancreatic polypeptide
C;Species: Myoxocephalus scorpius (shorthorn sculpin, daddy sculpin)
C;Date: 31-Dec-1992 #sequence_revision 31-Dec-1992 #text_change 20;Mar-1998
C;Accession: A60309; B26993

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       andropin precursor - fruit fly (Drosophila melanogaster)

N.Alternate names: antibacterial peptide, male-specific
C; Species: Drosophila melanogaster
C; Date: 19-War-1997 #sequence_revision 14-Nov-1997 #text_change 21-Jul-2000
C; Accession: S13450
EMBO J. 10, 163-169, 1991
A; Title: The andropin gene and its product, a male-specific antibacterial peptide in Drc
A; Reference number: S13450, MUID: 91114699
A; Reference number: S13450
A; Molecule type: DNA
A; Residues: 1.57 csAM>
A; Residues: 1.57 csAM>
A; Cross-references: EMBL:X56726; NID: 97588; PIDN: CAA40046.1; PID: 97589
A; Note: the authors translated the codon ATT for residue 44 as Thr
C; Comment: This protein is male-specific.
